Developing a sustainable HIV,
viral hepatitis & sexual health workforce

Culturally responsive care and Blood Borne viruses

Session One: Thursday 13 May, 6:00pm – 7:30pm (AWST)
Session Two: Thursday 20 May, 6:00pm – 7:30pm (AWST)
Location: Zoom (Online)

Session One:

Provides an overview of key migrant and refugee population needs and explores culturally responsive strategies in the management of ongoing CHB clinical care.

Session Two:

Join a panel of experts from the Humanitarian Entrant Health Service, Perth Children's Hospital, the Association for Services to Torture and Trauma Survivors (ASeTTS), Ethnic Communities Council WA and a lived experience representative

For: General Practitioners, Nurse Practitioners, Nurses and other interested healthcare workers.

Learning Objectives

- Increase understanding of the challenges and barriers experienced by people from migrant and refugee backgrounds who are living with CHB.
- Outline the importance of providing culturally responsive and trauma-informed health care, including working with interpreters.
- Contrast the trajectories of Hepatitis B disease in people from CALD backgrounds compared to people born in Australia.
- Describe the different biopsychosocial considerations faced by people from CALD communities living with CHB across their life span.
