Developing a sustainable HIV,
viral hepatitis & sexual health workforce

Hepatitis B Case Discussion Webinar

In this case discussion participants will discuss a range of Hepatitis B cases which will include different approaches to diagnosing, treating and managing people living with hepatitis B.

Thursday 26th of August 2021
6:00pm to 7:30pm (AWST)
Delivered Online via Zoom

This interactive training provides HBV prescribers and other primary care clinicians with an interest in HBV, an opportunity to apply their knowledge and skills to practical cases spanning diagnosis to treatment initiation and ongoing monitoring. Case scenarios are developed by ASHM clinical advisors or local experts to meet the identified learning needs of ASHM's HBV prescribers, which vary from each State and Territory.

Attendees are also encouraged to submit their own cases for discussion. You can receive a second HBV CPD point by submitting and discussing one of your own de-identified patient cases on the night. Please send any cases to Rachel.Woodcroft@ashm.org.au by 22nd August 2021.

This case discussion evening will be facilitated by Dr Fen Chin, a Specialist with extensive expertise in hepatitis B, and will take place via webinar.

Learning Objectives

- Plan guideline-based monitoring for patients with chronic hepatitis B
- Evaluate chronic hepatitis B patients' suitability for antiviral treatment
- Select and prescribe appropriate first-line antiviral medication for patients with chronic hepatitis B
