

Intersecting Clinical Documentation Improvement and Technology to Positively Impact Risk Adjustment and Patient Outcomes

Thursday, October 3, 2024, 11:00 AM – 12:00 PM PT

Presented by Episource

Program Description:

- Discuss why CDI input is needed in clinical documentation to review and validate AI output
- Learn how to empower your staff with a CDI workflow tool to make their work more efficient and accurate through flexibility and collaboration
- Connect the dots on how accurate diagnosis capture leads to improved quality of care

Ashok Nadimpalli, Director of Product,
Provider Solutions, Episource

Stacey Amick, Product Manager,
Episource

Ashok Nadimpalli

Ashok Nadimpalli has over a decade of experience in healthcare, focusing on developing technology solutions for Risk Adjustment Reporting, RCM, and OP CDI for Billing. His current role at Episource involves leveraging technology to optimize healthcare operations and improve patient care as the Director for Provider Solutions focusing on pre-visit programs. Ashok's educational background includes a Bachelor's degree in Electronic Engineering and an MBA from the Carlson School of Management.

Stacey Amick

Stacey Amick is a Product Manager for Provider Solutions at Episource, bringing together her experience in nursing, CDI/Coding, Risk Adjustment, and product development. Her career began as a Registered Nurse in Trauma and Surgery ICU at Parkland Hospital, a Level I Trauma Center, before transitioning into Trauma Case Management. Stacey later earned CPC and CRC certifications and moved into HCC coding and CDI at Signify Health. It was at Signify Health where she embarked on her path in product management, ensuring the clinical integrity of in-home health assessments. Stacey's unique combination of clinical expertise and product management skills allows her to spearhead innovative healthcare solutions, ultimately enhancing patient care and compliance.
