

Title: Updates to the Diagnosis and Early Management of Chronic Kidney Disease

Description: Nearly 40M Americans have Chronic Kidney Disease and Medicare alone spends over \$130B on CKD management every year. In the past few years medical associations and industry stakeholders have recognized the high burden associated with CKD and have developed new guidelines and interventions to better manage CKD and attempt to reduce costs associated with this condition. In this presentation, Quest Diagnostics will share important updates to medical and quality guidelines related to CKD management and the implications these have to providers as well as a few solutions that Quest has launched to help providers address CKD in their patients.

Speakers:

Dr. Sanjay Dixit

- 15+ years in the healthcare industry, most recently at Quest Diagnostics as Executive Director-Western U.S. for the Cardiovascular, Metabolic, and Endocrinology Division
- Numerous national speaking engagements on topics such as
 - Bridging Gaps in Care in CVD, T2DM, CKD, and NAFLD/NASH through Earlier Identification and More Effective Disease State Management
 - Value-Based Contracts and Shared-Risk
 - Healthcare-associated Digital Marketing and Data Aggregation
