

IPEX Announces 16th Facility Investment in Four Years New Distribution Centre in Middletown, Pennsylvania

Middletown, Pennsylvania, December 12, 2022 – IPEX is pleased to announce the continued expansion of its warehousing and distribution facilities with its 16th investment in just four years.

IPEX's newest distribution centre (DC) is located in the northeast region of the US at 2070 North Union Street in Middletown, Pennsylvania, an area currently serviced from IPEX's DCs in Charlotte and Pineville, NC, Cincinnati, OH, and Ontario, Canada.

"This DC is the newest in our multi-year strategy to expand our footprint in the United States," said Alex Mestres, IPEX's Chief Executive Officer. "Opening in the Northeast not only allows us to better serve customers in the region by having the products they want closer to them, but also creates more flexibility at our other DCs so we can continue to improve service levels for our customers in other regions."

The 250,000+ square-foot distribution center will incorporate industry-leading health and safety best practices and technologies – including scanning and material handling equipment, and pedestrian safety equipment. The new facility will also require the addition of 20 full-time employees with a projected opening in the spring of 2023. IPEX has already started hiring from the local area.

This expansion is an important investment that complements IPEX's other strategic investments, including the company's new state-of-the-art flagship molding facility in Pineville, North Carolina that is currently under construction. Future growth plans for IPEX in 2023 include additional DCs in the southern and western United States.

IPEX annonce son 16^e investissement en quatre ans Nouveau centre de distribution à Middletown, en Pennsylvanie

Middletown, Pennsylvanie, 12 décembre 2022 – IPEX est heureuse d'annoncer l'expansion continue de ses installations d'entreposage et de distribution avec son 16^e investissement en seulement quatre ans.

Le plus récent centre de distribution d'IPEX est situé dans la région nord-est des États-Unis, au 2070 North Union Street à Middletown, en Pennsylvanie, une région actuellement desservie par les centres de distribution d'IPEX à Charlotte et Pineville, en Caroline du Nord, à Cincinnati, en Ohio, et en Ontario, au Canada.

« Ce centre de distribution le plus récent dans notre stratégie pluriannuelle visant à étendre notre présence aux États-Unis, a déclaré Alex Mestres, directeur général d'IPEX. « L'ouverture dans le Nord-Est nous permet non seulement de mieux servir les clients de la région en leur proposant les produits qu'ils souhaitent plus près d'eux, mais aussi de créer une plus grande flexibilité dans nos autres centres de distribution afin de pouvoir continuer à améliorer les niveaux de service pour nos clients d'autres régions. »

Le centre de distribution de plus de 250 000 pieds carrés intégrera les meilleures pratiques et technologies de l'industrie en matière de santé et de sécurité, notamment des équipements de balayage et de manutention, ainsi que des équipements de sécurité pour les piétons. La nouvelle installation nécessitera également l'ajout de 20 employés à temps plein, avec une ouverture prévue au printemps 2023. IPEX a déjà commencé à embaucher dans la région.

Cette expansion représente un investissement important qui vient compléter d'autres investissements stratégiques d'IPEX, notamment la nouvelle usine phare de moulage de l'entreprise à la pointe de la technologie à Pineville, en Caroline du Nord, actuellement en construction. Les plans de croissance futurs d'IPEX en 2023 prévoient l'ouverture de nouveaux centres de distribution dans le sud et l'ouest des États-Unis.
