

Georgia Project Firstline

Acute care hospitals are [making progress in combating HAIs](#). Nationally, between 2021 and 2022, decreases in CLABSI, CAUTI, and VAE HAIs have been noted; however, we still have a lot of work to do. Connect with Georgia's [Infection Prevention and Control Education Experts](#) (IPCEE). They are sharing best practices, education, and resources to support people working in infection prevention.

1 in 25 hospital patients
has at least one healthcare-associated infection.

We want to learn about your infection control needs.

Georgia Project Firstline (GPFL) is helping health care workers understand the 'why' behind infection prevention recommendations and best practices. GPFL's mission is to support the advancement of infection prevention and control practices in the health care system. **Please encourage all health care workers to complete this [Learning Needs Assessment Survey](#).**

<https://www.surveymonkey.com/r/PFLLNA>

Take advantage of CDC's Project Firstline free resources, which are [designed to empower health care workers](#) to think critically about infection control.
